Daniel Evans

SOFTWARE ENGINEER

Mailing Address

7/150 Power Street, Hawthorn
VIC, 3122

Work Experience

Junior Software Engineer
Dye & Durham / Jul 2023 - Present

- Reduced UI build time by 45% in an Angular-based application, and eliminated dependencies on 4 third-party packages.
- Enhanced performance of a Flutter UI which verified property titles by 83% for 100 titles, and 98% for orders exceeding 350 titles. These changes enabled the business to process orders exceeding $5,000 each.
- Updated the documentation of 300+ microservices to improve the developer experience within the team.
- Migrated over 50 microservice CI/CD pipelines from TeamCity to GitHub Actions, resulting in faster build times, and better integration with GitHub repositories.

Front End Developer & Data Analyst
Employment Hero / Apr 2022- Jun 2023

- Integrated 6+ marketing tools via APIs into a centralised dashboard, streamlining budget and spend tracking.
- Built a React app 'Return on Investment' calculator utilised as a bottom-of-funnel tool to facilitate deal closures, saving an average of 5 minutes per client.

Data Engineer & Data Analyst
Cipher Sports Technology Group / Jan 2021 - Apr 2022

- Converted over 30+ statistical data models into azure functions significantly reducing manual effort.
- Reduced time taken to run Ice Hockey data model by 93% from 45 mins to 3 mins.
- Built an API using python's Flask framework to track the performance of all 40+ data models within the business.

Education

RMIT University
2019-2020
Master of Analytics
3.8/4 GPA

University of Melbourne
2014-2016
Bachelor of Science
